Chronicle Graphics Announces new OnePager product TimeArrow™ version 2.1 update

AUGUST 8, 2007. Chronicle Graphics today announces the commercial availability of its OnePager product along with upgrades to both TimeArrow™ and the free TimeArrow™ Viewer. Together, these products constitute the Chronicle Graphics suite of Rich Project Timeline software.

OnePager satisfies the need for a simple tool to convert Microsoft Project data into high-quality timeline graphics. It is a Microsoft Project Add-In that automates the creation of graphs that were formerly created manually in tools such as Microsoft Office Visio, Excel, and Powerpoint. Graphs produced by OnePager can be printed, pasted into PowerPoint presentations, emailed, or posted to web pages.

Version 2.1 of TimeArrow™ brings the following new features to Rich Project Timelines movies:

- | | |
|------------------------------|---|
| Comment Boxes | Add comments to an event, indicating what happened inside the event at various dates. |
| Event Links | Show relationships among events in your project plan. |
| Baseline Schedules | Show the baseline schedule for comparison against the current schedule. |
| Percent-Complete Bars | Indicate how much of a task has been done. |

About Chronicle Graphics

Chronicle Graphics, Inc. was founded in 2006 by software development and project-management veterans to automate the creation of graphical project stories. Their TimeArrow™ application suite enables people to import data from Microsoft Office applications and create compelling visuals for inclusion in PowerPoint presentations and web pages. More information on the Chronicle Graphics suite of products is available at www.chroniclegraphics.com.
