

Beautiful project timelines from any PPM tool.

OnePager Bundle is a dual license to OnePager Pro for Microsoft Project and OnePager Express for Excel and is intended for project managers who need to build project reports, timelines, and Gantt charts from different data sources at different times.

Product Overview

OnePager Bundle creates project timelines and Gantt charts from virtually any data source. Import directly from Project, Project Server, Project Online, or Excel. Through Excel, access a variety of other PPM tools such as Planisware, Primavera P6, Smartsheet, and more. All OnePager charts are 100% data driven, meaning that they are accurate and easy to format, without spending hours painstakingly formatting charts by hand in PowerPoint. Once built, any OnePager chart can easily be refreshed as the underlying project plan(s) change.

How it Works

- Create your plan in any PPM tool
- Easily send data to OnePager
- Customize colors, fonts, and layouts
- Share in PowerPoint, PDF, or however you like

What it Costs

- A perpetual license is \$569/seat
- Volume and enterprise discounts are available

Features

- Import directly from from Microsoft Project, Project Server/Online, and Excel
- Through Excel, import from Smartsheet, Primavera P6, Planisware, Jira, and virtually any other PPM tool.
- Group, sort, and color-code tasks
