OnePager®
FOR EXCEL

# Create Excel Gantt charts in minutes.

OnePager for Excel uses your real project data to create beautiful, customizable timeline summaries in minutes. It's the ultimate plan communications tool for Excel users.

## Product Overview

OnePager for Excel integrates with Microsoft Excel to create Gantt charts and timeline summaries, complete with milestones and progress bars. OnePager for Excel is ideal for relatively simple schedules that do not require the advanced features of Microsoft Project, or for creating timeline views using data exported from third-party PPM tools like Primavera, Planview or Planisware.

## How it Works

- Build a schedule or task list in Microsoft Excel
- Instantly send data to OnePager to create your chart
- Customize colors, fonts, and layouts
- Share in PowerPoint, on SharePoint, or however you like

## What it Costs

- A perpetual license is $449/seat
- Volume and enterprise discounts are available

## Features

- Import dates from Microsoft Excel
- Export to multiple formats
- Customize the timeline appearance
- Group, sort, and color-code tasks
- Attach comments to tasks
- Create and share project templates
- Illustrate project changes and baselines
- Make weekly updates
