

Beautiful project reports in minutes.

OnePager Pro for Microsoft Project, Project Server, Project Online, or Project for the web lets project and portfolio managers instantly create Gantt charts, timeline summaries, and other visuals using real data from within the world's most popular PPM tools.

Product Overview

OnePager Pro creates timelines and Gantt charts that are perfect for team reviews and stakeholder reviews. Whether you need to present a single project overview or a multi-project portfolio, OnePager Pro allows project managers and schedulers to show a project's progress and how it has changed, all in a simple timeline. OnePager does all the work; all you need to do is customize your graphic and reap the rewards.

How it Works

- Create your plan in Microsoft Project
- Instantly send data to OnePager
- Customize colors, fonts, and layouts
- Share in PowerPoint or PDF

What it Costs

- A perpetual license is \$499 USD/seat
- Volume and enterprise discounts are available

Features

- Import from Microsoft Project, Project Online, Project Server, or Project for the web
- Export to multiple formats
- Customize the timeline appearance
- Group, sort, and color-code tasks
- Create and share project templates
